### Publisher's Editorial Statement

FUNDAMENTAL AND APPLIED TOXICOLOGY, an official publication of the Society of Toxicology, publishes scientific articles and reports relating to those broad aspects of toxicology which are relevant to assessing the risk or effects of toxic agents (chemicals, including drugs and natural products or forms of energy) on human and other animal health. Examples include statistical and mathematical methods of risk assessment and safety evaluation studies which are structural, biochemical or functional in nature. FUNDAMENTAL AND APPLIED TOXICOLOGY also will consider manuscripts that are concerned with methods or systems of evaluation of toxicity as an alternative to the use of experimental animals.

Also included are papers on methods and equipment, regulatory issues on policy papers relevant to the practice of toxicology, scientific reviews on specific topics, and papers from symposia. Special sections will cover meetings, book reviews and letters to the editor.

FUNDAMENTAL AND APPLIED TOXICOLOGY (ISSN 0272-0590) is published bimonthly for \$50 per year to U.S. subscribers, \$60 elsewhere (prepaid, U.S. funds) by the Society of Toxicology, 475 Wolf Ledges Parkway, Akron, OH 44311-1087.
