CONTENTS

TOXICOLOGICAL HIGHLIGHT

The Use of Nasal Dosimetry Models in the Risk Assessment of Inhaled Gases

Jeffry D. Schroeter ................................................................. 1

REVIEW

Oxidative Stress in Developmental Origins of Disease: Teratogenesis, Neurodevelopmental Deficits, and Cancer

Peter G. Wells, Gordon P. McCallum, Connie S. Chen, Jeffrey T. Henderson, Crystal J. J. Lee, Julia Perstin, Thomas J. Preston, Michael J. Wiley, and Andrea W. Wong ................................................................. 4

FORUM SERIES: THE ‘VISION’ FOR TOXICITY TESTING IN THE 21ST CENTURY

Bette Meek and John Doull .......................................................... 19

BIOTRANSFORMATION AND TOXICOKINETICS

Manganese Tissue Dosimetry in Rats and Monkeys: Accounting for Dietary and Inhaled Mn with Physiologically based Pharmacokinetic Modeling

Andy Nong, Michael D. Taylor, Harvey J. Clewell, David C. Dorman, and Melvin E. Andersen .................................................. 22

Increased Nrf2 Activation in Livers from Keap1-Knockdown Mice Increases Expression of Cytoprotective Genes that Detoxify Electrophiles more than those that Detoxify Reactive Oxygen Species

Scott A. Reisman, Ronnie L. Yeager, Masayuki Yamamoto, and Curtis D. Klaassen ................................................................. 35

CARCINOGENICITY

Regulation of Peroxisome Proliferator–Activated Receptor-α by MDM2

Lakshmi Gopinathan, Daniel B. Hannon, Jeffrey M. Peters, and John P. Vanden Heuvel ................................................................. 48

Case Study: An Evaluation of the Human Relevance of the Synthetic Pyrethroid Metofluthrin-Induced Liver Tumors in Rats Based on Mode of Action

Tomoya Yamada, Satoshi Uwagawa, Yasuyoshi Okuno, Samuel M. Cohen, and Hideo Kaneko ................................................................. 59

Mode of Action Analysis for the Synthetic Pyrethroid Metofluthrin-Induced Rat Liver Tumors: Evidence for Hepatic CYP2B Induction and Hepatocyte Proliferation

ENVIRONMENTAL TOXICOLOGY

First Identification of the Hepatotoxic Microcystins in the Serum of a Chronically Exposed Human Population Together with Indication of Hepatocellular Damage

Jun Chen, Ping Xie, Li Li, and Jun Xu .................................................. 81

Continued
GENETIC TOXICOLOGY

Biomarkers of Human Exposure to Acrylamide and Relation to Polymorphisms in Metabolizing Genes
Nur Duale, Thomas Bjellaas, Jan Alexander, Georg Becher, Margaretha Haugen, Jan Erik Paulsen,
Henrik Frandsen, Pelle Thonning Olesen, and Gunnar Brunborg .......................................................... 90

IMMUNOTOXICOLOGY

JP-8 Induces Immune Suppression via a Reactive Oxygen Species NF-κB–Dependent Mechanism
Gerardo Ramos, Alberto Y. Limon-Flores, and Stephen E. Ullrich .......................................................... 100

N,N-Diethyl-m-Toluamide (DEET) Suppresses Humoral Immunological Function in B6C3F1 Mice
Deborah E. Keil, W. David McGuinn, Andrew C. Dudley, Jackie G. EuDaly, Gary S. Gilkeson, and
Margie M. Peden-Adams ......................................................................................................................... 110

IN VITRO TOXICOLOGY AND ALTERNATIVE TESTING

Cadmium Toxicity toward Autophagy through ROS-Activated GSK-3β in Mesangial Cells
Sheng-Hao Wang, Yung-Luen Shih, Tai-Chin Kuo, Wun-Chang Ko, and Chwen-Ming Shih .................. 124

Valproic Acid–Induced Deregulation In Vitro of Genes Associated In Vivo with Neural Tube Defects
Måns Jergil, Kim Kultima, Anne-Lee Gustafson, Lennart Dencker, and Michael Stigson ......................... 132

NEUROTOXICOLOGY

Potential Neurotoxicity of Ketamine in the Developing Rat Brain
Xiaoju Zou, Tucker A. Patterson, Natalya Sadovova, Nathan C. Twaddle, Daniel R. Doerge, Xuan Zhang,
Xin Fu, Joseph P. Hanig, Merle G. Paule, William Slikker, and Cheng Wang ............................................. 149

Acute Perchloroethylene Exposure Alters Rat Visual-Evoked Potentials in Relation to Brain Concentrations
William K. Boyes, Mark Bercegeay, Wendy M. Oshiro, Q. Todd Krantz, Elaina M. Kenyon,
Philip J. Bushnell, and Vernon A. Benignus ............................................................................................ 159

RESPIRATORY TOXICOLOGY

HIGHLIGHTED ARTICLE:
Inhalation Dosimetry of Diacetyl and Butyric Acid, Two Components of Butter Flavoring Vapors
John B. Morris and Ann F. Hubbs ............................................................................................................. 173

SYSTEMS TOXICOLOGY

Hepatotoxic Interaction of Sulindac with Lipopolysaccharide: Role of the Hemostatic System
Wei Zou, Sachin S. Devi, Erica Sparkenbaugh, Husam S. Younis, Robert A. Roth, and Patricia E. Ganey .... 184

Inflammatory Biomarkers of Sulfur Mustard Analog 2-Chloroethyl Ethyl Sulfide–Induced Skin Injury
in SKH-1 Hairless Mice
Neera Tewari-Singh, Sumeet Rana, Mallikarjuna Gu, Arttatrana Pal, David J. Orlicky, Carl W. White,
and Rajesh Agarwal .................................................................................................................................. 194

Comparative Microarray Analysis and Pulmonary Changes in Brown Norway Rats Exposed to Ovalbumin
and Concentrated Air Particulates
Brooke L. Heidenfelder, David M. Reif, Jack R. Harkema, Elaine A. Cohen Hubal, Edward E. Hudgens,
Lori A. Bramble, James G. Wagner, Masako Morishita, Gerald J. Keeler, Stephen W. Edwards, and
Jane E. Gallagher ....................................................................................................................................... 207

Erratum ....................................................................................................................................................... 222
