Comparative Medicine

Animal Models in Biomedical Research

Editor
Henry Baker
Auburn University, Alabama

A scholarly international journal, Comparative Medicine focuses on topics relevant to the use of animal models in biomedical science, particularly human and animal health research. The journal features research articles as well as critical reviews of timely topics written by recognized leaders in the field.

Research Areas Include
• Animal models that advance knowledge of disease mechanisms, prevention, or therapy of diseases
• Animal species that provide unique research opportunities because of unusual structure, function, or susceptibility to disease
• Complications that compromise or invalidate research using animals, such as intercurrent or inapparent diseases
• New information on defining genetic, microbiological, or physiological status of research animals
• Major technical advances or unique approaches to research using animals

Volume 1 (1992), 2 issues
In the U.S.A. and Canada: $72.00
All other countries: $82.00

Sample copies and privileged personal rates are available upon request.
For more information, please write or call:
ACADEMIC PRESS, INC.
Journal Promotion Department
1250 Sixth Avenue, San Diego, CA 92101, U.S.A.
(619) 699-6742

All prices are in U.S. dollars and are subject to change without notice
Canadian customers: Please add 7% Goods and Services Tax to your order.
CONTENTS

SYMPOSIUM OVERVIEWS

An Update on Exposure and Effects of Lead
Barbara D. Beck ................................................................. 1

Health Effects of Atmospheric Acid Aerosols: A Model Problem in Inhalation Toxicology and Air Pollution Risk Assessment
Richard B. Schlesinger and Judith A. Graham .......................... 17

REGULAR ARTICLES

Chronic Toxicity Carcinogenicity Studies of Triethanolamine in B6C3F1 Mice
Yoichi Konishi, Ayumi Denda, Kazuhiko Uchida, Yohko Emi, Hitoshi Ura, Yoshikiko Yokose, Kazumi Shiraia, and Masahiro Tsutsumi ........................................ 25

Dermal Absorption of Dilute Aqueous Chloroform, Trichloroethylene, and Tetrachloroethylene in Hairless Guinea Pigs
Kenneth T. Bogen, Bill W. Colston, Jr., and Lesia K. Machicao ................................. 30

Immunotoxicological Characteristics of Sodium Methyldithiocarbamate
Stephen B. Pruett, Donna B. Barnes, Yun-Cheng Han, and Albert E. Munson ................................. 40

Subchronic (13-Week) Toxicity Studies of Oral Phenolphthalein in Fischer 344 Rats and B6C3F1 Mice
D. D. Dietz, M. R. Elwell, R. E. Chapin, M. D. Shelby, M. B. Thompson, R. Filler, and M. A. Stedham ................................. 48

Reversible Inhibition of Intercellular Communication among Cardiac Myocytes by Halogenated Hydrocarbons
Mark Toraason, Michael J. Breitenstein, and Howard E. Wey ................................. 59

Sex Differences in Monochloroacetate Pretreatment Effects on Chloroform Toxicity in Rats
Mary E. Davis and William O. Berndt ...................................................... 66

Neuropathological Effects of Triphenyl Phosphite on the Central Nervous System of the Hen (Gallus domesticus)
Duke Tanaka, Jr., Steven J. Bursian, and Ellen J. Lehning ................................. 72

A Comparison of the Acute Toxicity, Neuropathology, and Electrophysiology of N,N-Diethyl-m-toluamide and N,N-Dimethyl-2,2-diphenylacetamide in Rats

Combined Repeat Dose and Reproductive/Developmental Toxicity Screening Test (OECD): Familiarization Using Cyclophosphamide
Satoru Tanaka, Kunio Kawashima, Katsushi Naito, Makoto Usami, Masahiro Nakadate, Katsumi Imaida, Michihito Takahashi, Yuzo Hayashi, Yuji Kurokawa, and Masuo Tobe ...................................................... 89

Evaluation of Teratogenic Potential of N-Formylpiperidine in Rats
Rashmi S. Nair, Lou Alvare, and Frederick R. Johannsen ................................. 96
