Contents
Volume 58, Number 1, November 2000

Toxicological Highlight

Assessing Dermal Absorption
Torka S. Poet .................................................. 1

Profiles in Toxicology

Cytochrome P450, the Oxygen-Activating Enzyme in Xenobiotic Metabolism
Robert Snyder .................................................. 3

Forum

Latex Allergy in the Workplace
Mark Toraason, Gordon Sussman, Raymond Biagini, Jean Meade, Donald Beezhold, and Dori Germolec . . . 5

Biotransformation and Toxicokinetics

Comparative in Vitro-in Vivo Percutaneous Absorption of the Pesticide Propoxur
Johannes J. M. van de Sandt, Wim J. A. Meuling, Graham R. Elliott, Nicole H. P. Cnubben, and Betty C. Hakkert .......................................................... 15

In Vitro Kinetics of Coumarin 3,4-Epoxidation: Application to Species Differences in Toxicity and Carcinogenicity
Stephanie L. Born, Douglas Caudill, Bill J. Smith, and Lois D. Lehman-McKeeman .................. 23

Carcinogenicity

Reevaluating Cancer Risk Estimates for Short-Term Exposure Scenarios
N. Christine Halmes, Stephen M. Roberts, J. Keith Tolson, and Christopher J. Portier ............... 32

Modifying Effects of Ethinylestradiol but Not Methoxychlor on N-ethyl-N-nitrosourea-Induced Uterine Carcinogenesis in Heterozygous p53-Deficient CBA Mice
Kunitoshi Mitsumori, Takeo Shimo, Hiroshi Onodera, Hisayoshi Takagi, Kazuo Yasuhara, Toru Tamura, Yasuji Aoki, Osamu Nagata, and Masao Hirose ......................................................... 43

Endocrine Toxicology

The Effect of Atrazine on Puberty in Male Wistar Rats: An Evaluation in the Protocol for the Assessment of Pubertal Development and Thyroid Function

Environmental Toxicology

A Small-Volume Bioassay for Quantification of the Esterase Inhibiting Potency of Mixtures of Organophosphate and Carbamate Insecticides in Rainwater: Development and Optimization
Timo Hamers, Kim R. J. Molin, Jan H. Koeman, and Albertinka J. Murk .................. 60

Comparative Metabolism and Excretion of Benzo(a)pyrene in 2 Species of Ictalurid Catfish
Kristine L. Willett, Piero R. Gardinali, Laila A. Lienesch, and Richard T. Di Giulio ............... 68

Continued
IMMUNOTOXICOLOGY

Modeling and Predicting Selected Immunological Effects of a Chemical Stressor (3,4-Dichloropropionanilide) Using the Area under the Corticosterone Concentration versus Time Curve
Stephen B. Pruett, Ruping Fan, Qiang Zheng, L. Peyton Myers, and Pamela Hébert .......................... 77

A Single Dose of 2,3,7,8-Tetrachlorodibenzo-p-dioxin Produces a Time- and Dose-Dependent Alteration in the Murine Bone Marrow B-Lymphocyte Maturation Profile
T. S. Thurmond and T. A. Gasiewicz ........................................................ 88

IN VITRO TOXICOLOGY AND ALTERNATIVE TESTING

Inhibition of CFU-E/BFU-E by 3’-Azido-3’-deoxythymidine, Chlorpropamide, and Protoporphyrin IX Zinc (II): A Comparison between Direct Exposure of Progenitor Cells and Long-Term Exposure of Bone Marrow Cultures
L. Gribaldo, I. Malerba, A. Collotta, S. Casati, and A. Pessina .............................. 96

MOLECULAR AND GENETIC TOXICOLOGY

Induction of Micronuclei following Exposure to Methylene Di-phenyl Diisocyanate: Potential Genotoxic Metabolites
B. Z. Zhong and P. D. Siegel ................................................................. 102

Protection against Fas Receptor-Mediated Apoptosis in Hepatocytes and Nonparenchymal Cells by a Caspase-8 Inhibitor in Vivo: Evidence for a Postmitochondrial Processing of Caspase-8
Mary Lynn Bajt, Judy A. Lawson, Steven L. Vonderfecht, Jaspreet S. Gujral, and Hartmut Jaeschke . . 109

NEUROTOXICOLOGY

Interactions of the Organophosphates Paraoxon and Methyl Paraoxon with Mouse Brain Acetylcholinesterase
Stacey A. Kardos and Lester G. Sultatos .......................... 118

Various Nitric Oxide Donors Protect Chick Embryonic Neurons from Cyanide-Induced Apoptosis
Mads Skak Jensen, Niels Chresten Berg Nyborg, and Erling Sonnich Thomsen ............................. 127

REPRODUCTIVE AND DEVELOPMENTAL TOXICOLOGY

Effect of Atrazine on Implantation and Early Pregnancy in 4 Strains of Rats
A. M. Cummings, B. E. Rhodes, and R. L. Cooper .......................... 135

Analysis of the Combined Osteolathyritic Effects of β-Aminopropionitrile and Diethyldithiocarbamate on Xenopus Development
Melissa A. Cotter, Deidre L. Policz, Gerald Pöch, and Douglas A. Dawson .......................... 144

RESPIRATORY TOXICOLOGY

Efficient Protection of Human Bronchial Epithelial Cells against Sulfur and Nitrogen Mustard Cytotoxicity Using Drug Combinations

Disposition of [Ring-U-14C]styrene in Rats and Mice Exposed by Recirculating Nose-Only Inhalation

Inhalation Toxicity of 1,6-Hexamethylenediisocyanate Homopolymer (HDI-IC) Aerosol: Results of Single Inhalation Exposure Studies
Jürgen Pauluhn .......................... 173

Continued
Upper Respiratory Tract Toxicity of Inhaled Methylvinyl Ketone in F344 Rats and B6C3F1 Mice
Daniel L. Morgan, Herman C. Price, Robert W. O’Connor, John C. Seely, Sandra M. Ward, Ralph E. Wilson,
and Michael C. Cunningham ............................................................... 182

SAFETY EVALUATION
The Effects of Diet, ad Libitum Feeding, and Moderate and Severe Dietary Restriction on Body Weight,
Survival, Clinical Pathology Parameters, and Cause of Death in Control Sprague-Dawley Rats
Marie-Françoise Hubert, Philippe Laroque, Jean-Pierre Gillet, and Kevin P. Keenan .................. 195

SYSTEMS TOXICOLOGY
Lipopolysaccharide Augments Aflatoxin B1-Induced Liver Injury through Neutrophil-Dependent and
-Independent Mechanisms
C. Charles Barton, Patricia E. Ganey, and Robert A. Roth ....................................... 208

ERRATUM
In “PCBs, Thyroid Hormones, and Ototoxicity in Rats: Cross-Fostering Experiments Demonstrate the Impact of
Postnatal Lactation Exposure” (Toxicological Sciences 57, pp. 131–140, 2000) by K. M. Crofton, P. R. S.
Kodavanti, E. C. Derr-Yellin, A. C. Casey, and L. S. Kehn, the values presented in the right panel of Figure 6
(cortical PCB concentrations) are incorrect. The y-axis was incorrectly labeled. The correct axis labels should be
from 1.0 to 300,000 ppb, not 0.1 to 30,000 ppb. The correct mean values for this figure are given below:

<table>
<thead>
<tr>
<th>Exposure group</th>
<th>Group Mean PCB, ppb</th>
</tr>
</thead>
<tbody>
<tr>
<td>Ctrl/Ctrl</td>
<td>32.4</td>
</tr>
<tr>
<td>A1254/A1254</td>
<td>2436.0</td>
</tr>
<tr>
<td>A1254/Ctrl</td>
<td>19.7</td>
</tr>
<tr>
<td>Ctrl/A1254</td>
<td>1741.0</td>
</tr>
</tbody>
</table>
